PHAR 228/PATH 228
Modern Drug Discovery Techniques (MDDT)
Spring 2018

Course Description:
This class is taught by program faculty and staff whose laboratories are actively involved in discovering and developing drugs against therapeutically relevant targets, or who have held leadership positions in pharma and biotech. The course covers the basic principles of a wide range of drug discovery approaches and provides the students with real examples including those ongoing at Sanford Burnham Prebys Medical Discovery Institute (SBP).

Days/Times/Location:
**Sanford Burnham Prebys Medical Discovery Institute**
Wednesdays from 10:00am-12:00pm from April 4th-May 9th
(Bldg. 5, Room 5332)
**AND**
Additional Classes (all from 10:00am-12:00pm):
• Monday, May 7th (in Bldg. 10, Room 1501)
• Tuesday, May 15th (in Bldg. 6, Room 6319)
• Wednesday, May 23rd (in Bldg. 5, Room 5332)
• Tuesday, May 29th (in Bldg. 6, Room 6319)
**Note: All locations are on the SBP campus.**
